Interior Cleaning System

The SpaceVac Internal high-level cleaning system is a revolution in high-level cleaning.

Offering 11m of reach, the system gives operators the ability to clean quickly and efficiently from the safety of the ground floor.

Our lightweight interlocking cleaning poles, come with a diverse range of heads and attachments to offer a flexible and powerful cleaning solution for operators maintaining facilities such as;

- Cinemas & Theatres
- Schools & Colleges
- Shopping centres & malls
- Stadiums & Arenas
- Museums
- Warehouses & Factories

Further - **built with safety at heart**, all of our brushes and heads are interconnectable to provide interchangeable options, while all of our tools, heads and brushes are equipped with our unique Safety Locking Mechanism to ensure total operator safety.

Finally - all of the SpaceVac's cleaning systems, come with a hose to pole adaptor ensuring continuous suction.

Whats Included:

Pole Kit:

- 5 x 1.6m Carbon Fibre Poles
- 1 x 0.8m Carbon Fibre Pole
- Padded pole bag

Head Kit:

- 3 x Carbon Fibre cleaning heads
- 5 x Specialist brushes and attachments

Hose Kit:

- 5m hose
- Hose to Vac Adaptor

Camera Kit:

- Wireless camera & clip
- Wireless monitor and clip
- Camera bag

Exterior Cleaning System

The SpaceVac External high-level cleaning system is the perfect solution for cleaning and maintaining blocked guttering and downpipes.

Keeping guttering and overflow systems clear and free of blockages is crucial for both the integrity of building structures and also the health of the occupants. Offering 15m of reach, the system gives operators the ability to clean these problem areas quickly and efficiently from the safety of the ground floor.

Our lightweight interlocking cleaning poles, feature a 50mm diameter for improved airflow at height and less blockages when removing heavy duty blockages. Further the system comes equipped with a diverse range of heads and tools for quickly removing even the most stubborn of build ups.

Further - **built with safety at heart**, all of our heavy duty, industrial strength heads and cleaning tools are equipped with our unique Safety Locking Mechanism to ensure total operator safety by preventing separation when the system is in use.

Finally - all of the SpaceVac's cleaning systems, come with a hose to pole adaptor which is designed to prevent the hose slipping of the pole, this ensures continuous suction.

Whats Included:

Pole Kit:

- 6 x 1.6m 50mm Carbon Fibre Poles
- 1 x 0.8m 50mm Carbon Fibre Pole
- Padded pole bag

Head Kit:

- 1 x Aluminium cleaning heads
- 4 x Aluminium cleaning heads

Hose Kit:

- 5m 50mm hose
- Hose to Vac Adaptor

Camera Kit:

- Wireless camera & clip
- Wireless monitor and clip
- Camera bag

ATEX Cleaning System

The SpaceVac ATEX system brings our revolutionary high-level cleaning system to specialist explosive atmospheres worldwide.

ATEX areas are prone to explosions due to the build up and deflagration of combustible dusts requiring specialist tools to clean and maintain them.

SpaceVacs ATEX system features a full carbon version of our 38mm poles along with full carbon and ATEX certified versions of our internal pole and head kit - featuring a range of specialist tools and brushes - all featuring our unique Safety Locking Mechanism for total operator safety during operation.

A completely conductive, anti-static cleaning system, SpaceVacs ATEX system is protected under worldwide patent and is the first system of its kind anywhere in the world to be certified as safe for use in these specialist explosive atmospheres.

Finally - all of the SpaceVac's cleaning systems, come with a hose to pole adaptor which is designed to prevent the hose slipping of the pole, this ensures continuous suction when in use.

Whats Included:

Pole Kit:

- 5 x 1.6m Full Carbon 38mm Poles
- 1 x 0.8m Full Carbon 38mm Pole
- Padded pole bag

Head Kit:

- 3 x Full Carbon cleaning heads
- 5 x Specialist brushes and attachments

Hose Kit:

- 5m ATEX hose
- Hose to Vac Adaptor

Case Studies

Some of our clients include...

As one of the biggest property owners in the UK, Tesco has a huge nationwide estate of buildings of all shapes and sizes, in a range of locations and environments.

One of the things that these stores all share in common though, is the need to keep their gutters and downpipes clear of blockages and dirt.

With our lightweight interlocking 50mm poles and durable range of tools and heads, we were the perfect solution to a perennial problem for facilities managers.

After trialling SpaceVac in a limited number of stores, Tesco placed a large order of SpaceVac's external

cleaning system to deploy to their in-house facilities management teams across the UK.

These were rolled out to the estate throughout 2017; all supported by a full nationwide training program delivered by SpaceVacs in house team of dedicated cleaning professionals.

SpaceVac's Internal cleaning system was the perfect choice when Swedish retailer Ikea were looking for a high-level cleaning solution.

Historically, the FM team onsite had to clean the myriad of high-level installations in-store as well as built up dust in the myriad of overhead cable trays found in all of the stores.

When dust built up in these trays, the cables are not able to cool sufficiently, and as a result - the built up dust becomes a fire hazard.

Where previously, a 2 man team utilised a hydraulic platform on

wheels to clean small areas at a time, SpaceVac enabled one man to clean the same area much faster with less impact on the rest of the store.

The system is now a standard part of Ikea's Facility Management plan across Sweden.
